

Dear The Pennsylvania State House, The Pennsylvania State Senate, and Governor Tom Wolf,

We are pleased to present you with this petition affirming this statement:

**"Legalize, decriminalize, and allow home grown marijuana in Pennsylvania. Also pardon marijuana offenders whose lives we ruined by the war on the plant."**

Attached is a list of individuals who have added their names to this petition, as well as additional comments written by the petition signers themselves.

Sincerely,  
Christy Billett

I am on a handful of medications currently I fell 45ft out of a tree landed head first n killed a spot of my brain and injured my back which in return gave me seizures amongst many other preexisting conditions. I am all for the legalization of the whole marijuana plant in PA. It helps with my depression, insomnia and anxiety but most important if smoke just a joint or 2 a day then my seizures stop, I can honestly say I have not had 1 seizure on days I smoke. It has helped me more then any pill prescribed by drs which I've been seeing my whole even my drs say if its helping I'm not going to tell you stop but professionally they can't tell me it's a good idea. I would like to be able to recieve medical cannibis to help my conditions Thank you

my mom had cancer and the doctors said they don't know why her cancer isn't spreading like the rest of the patients in her ward. We can't tell the doctors that she's in RSO because it's illegal. Can u imagine a drug that help the human body and had basically no harm only good., and it's illegal. So killing my mom is legal I guess because you won't legalize the medicine that is working.

Jeffrey Mastro

Medical Cannabis would be a big achievement by the people to change the perspective of a lie that the government made to make us believe that this plant doesn't do anything which came the idea that this plant was only known for getting high and bad teenagers to the 20th century view of medicine and the children who are suffering everyday just wishing they could live a normal life we need change and change is coming!

Three points. 1. Historically prohibition does not work. 2. Cannabis has saved human lives even saving the lives of children and YOU are responsible for whether this occurs in Pennsylvania while there is a clear, safe, alternative that has even been tested by other states. 3. Prohibition has ruined the lives and spread hatred throughout the hearts of my fellow Pennsylvanians for far too long.

We should, at the very least, give citizens the right to choose a more natural &, more importantly, central medicine. The time is well overdue where we, as Americans, have to realize that the game that politicians, lobbyists, pharmaceutical companies, etc. are playing with our fellow citizens & ourselves is a deadly one at best. We are not test subjects, we are not subjects period. We are people & we deserve the right to make our own decision as to what medicine we find suitable for our various ailments. I, myself, suffer from anxiety & depression & benefit greatly from the plant. I, as many others who utilize the plant medicinally, should not have to be cloak & dagger about what helps us strive through our daily lives!

Doctors who have studied medical marijuana recommend certain illnesses be treated through smoking. It is often the more efficient method of entry for marijuana. By gutting the bill previously set forth to exclude combusted marijuana, politics is overstepping its boundaries between science, doctors & patients. Legalize the whole plant to be administered the best way a doctor recommends for the patient.

I have crohns disease and ankalsoing spondylitis and cannabis helps alleviate the pain and flare ups! Had crohns for 20+ years and ankalosing spondylitis for 12 give or take years. The pain and mobility have gotten so bad I haven't worked in 3 years awaiting to hear from disability. Marijuana is much more safe than alcohol and tobacco and they don't help anyone. Please help the sick get better by making it legal to carry, grow and use medical marijuana. Thank you for your time.

End cannabis prohibition. It's the right thing to do for your constituents, for the Commonwealth, and for patients like my father who suffer from RSD/CRPS. Prohibition was based on lies, racism, and greed, and Pennsylvanians of today are better than that. So too must you be.

just make it legal already! !! I highly doubt that anyone is going to stop smoking weed because you said it's illegal. I know that I have no intention on stopping. I'm not going to suffer from ptsd and the effects of it because you won't be rational and legalize it. I have never touched another drug. I'm strictly a Marijuana smoker, I am going to be one until I die. I'm sure you are not interested in being made to feel like a fool. I understand that. but the entire world looks at you like you're a incompetent fool. I don't blame them.

This medicine is great for more than just children seizures. It's such relief for chronic pain, especially from Rheumatoid arthritis which won't be covered, and nausea from cancer treatments. One shouldn't have to travel across the state to a certified outlet for Charlotte's Web, which is hyper-strong concentrations of THC. Not everyone needs that. But people should not have to use addicting vicodin or oxy for their pain.

Everyone should be entitled to the freedom of picking pieces of a plant to use as medicine and comfort for both mental and physical ailments. Everyone could benefit from this plant, veterans, the sick, the terminally ill, even the average stressed out working man or woman! Suicide rates would drop, opium addictions, pills, all these methadone clinic people walking around Altoona, its sick how many prescription drugs are floating around more than anything and people getting messed up and in accidents and killed over PILLS!! But a natural God given plant is illegal. Whats the difference in coffee beans? Used for the caffeine? Tobbacco? Mint?! Such a shame that our great commonwealth is still living in the shadow of fear and propaganda, Anslinger is to blame!! We need to wake up! Help the people!!

Heather Sul  
altoona, PA 16601

its effects are FAR less harmful than alcohol and it is proven to benefit MANY people who suffer many different illnesses and its natural unlike other synthetic and highly addictive painkilling drugs! no harmful side effects. eliminate the need for one person yo take a bunch of different meds for all their different medical problems! let them eliminate all or many by prescribing marijuana!!!! it doesnt have to be smoked to get the benefits so what other excuses are there to NOT legalize it? what? its a gateway drug? BS ... and alcohol isnt? LEGALIZE IT!

It's time to stop making criminals out of ordinary, tax paying, law abiding citizens under the disingenuous guise of "public safety." We all know it's about the money. Pure and simple fact. So craft a bill that ensures cannabis enables the rich corporations and pharmas and removes it from the grasp of the ones who need it the most. Those who struggle. Physically, mentally or emotionally.

Marijuana is safer than alcohol. Marijuana helps many people medically. It helps cancer patients from being sick after chemotherapy, it helps people with chronic pain by lessening the pain, as well as helping numerous other medical issues all while being safer than a man made pharmaceutical. I would like full legalization however I believe we certainly need medical legalized as it will help thousands.

For all the amazing things that can come from just this one plant and you not have to worry about a label that have 1000 different things that could happen to you if you take it this plant only has hunger, sleepy, happy, but the benefits are amazing it can help with ever day chronic pain its good for anxiety and it helps slow the progression of cancer and helps you with your appetite and can stop little kids for seizures and adults to and its even been know to help a women with ALS live a lot longer then any doctor said that she would and its all thanks to marijuana but you cant find a prescription that could do that but its now been found that there is a way to use hemp to restore damaged dna which is just amazing because that is something that just naturally happens when you get older but this can fix it along with all the many different CBS that the plant has that has not been studied because theirs no funding so to keep a plant that was place here to help us and not destroy us like the other schedule 1 drugs would do its crazy to even think that it can be on that same level something as amazing as this should be available everywhere so that you no longer have to be paranoid or worry about everything being taken away form you like your job your home or even your kids this should never happen period it is a crime and a sin and it disgust me so come on congress and all of america lets do the right thing and legalize it for all to use and not have to worry about going behind the laws back to deal with potentially dangerous criminals we want to be able to get it safely and do it legally so lets do this and get marijuana legalized finally

i have 'incurable' autoimmune disease which would most likely be treated more safely & effectively than my current treatments, potentially CURED by cannabis oil treatment. but as it stands, im stuck with expensive, dangerous pharmaceuticals which treat isolated symptoms, not very effectively, and with substantial risks, side effects, and a huge price tag. cannabis is a safer, better medication with a broader scope of treatment. end the senseless prohibition of the best medication nature provides, for the wellbeing of pennsylvanians like me. please.

Plz legalize, not all people use marijuana for bad reasons....it helps with pain and nausea....with people who anorexic etc....

charity Droll  
Altoona, PA 16602  
Dec 24, 2014

---

Marijuana prohibition must end. By all scientific measures, it is less dangerous than other legal drugs - and it has significant health properties. Prohibition has destroyed many lives and careers. In addition, there is significant tax revenue available to states that adopt a medical and recreational use of the plant.

I don't even do drugs but think they all need to be legal. People should have the right to do what they want on their own property. Tax dollars need to be spent on things other than the war against drugs. LEO need to be doing more important things and people serving time for possession is pathetic. Real criminals belong there, not drug users.

Chris Yurczak  
Pittsburgh, PA 15235  
Dec 20, 2014

Dec 20, 2014

---

Jeremy  
Erie, PA 16502  
Dec 20, 2014

---

The "War on Drugs" has been ineffective at preventing the use of marijuana. There are many health benefits related to marijuana use. The legalization and taxation of this natural plant would generate much more revenue than keeping it illegal and locking people up for it which in turn costs taxpayers too much money. Treat marijuana legalization the same as alcohol and use the tax money to better fund public education and PenDOT.

Joseph McGinley Jr.

The prohibition of marijauna is á unjust act. Marijuana has never been linked to directly killing anyone, furthermore it's a medicine that had been proven to help people in need. The continued prohibition of marijuana is a injustice unless you plan to make alcohol and tobacco illegal as well. Thank you for your time.

Legalizing marijuana is honestly one of the best economic and social decisions you can make. It will substantially decrease the number of people with criminal charges for minor drug use (people who would be better off in a rehabilitation program than a jail), thus reducing the money spent on prisons and judicial proceedings. Once marijuana is legal, people will be able to legally farm it (adding a crop the state can profit from), and the state can tax it heavily, thus definitively increasing state revenue. Finally, as this country saw during Prohibition, making minor drugs/alcohol illegal will not decrease the number of people using the substance. (Alcohol actually decreased after Prohibition was abolished.) Just some notes to ponder...

The war on cannabis is costing this state too much. Not only are we wasting countless tax dollars on the man hours wasted for law enforcement and the penal system following, but we are losing a giant positive revenue and industry. With legal cannabis, we have a massive renewable resource for paper products. Cannabis has many other uses too. Hempcrete is one of the strongest construction stone products known to man. Aside from using these resources to rebuild our infrastructure (such as our crumbling bridges), we can use its sales to fund it. Recreational cannabis legalization has created enough money in taxes to put millions into public schools in Colorado. This is big considering the U.S. does not rank in the top 20 on in the developed world, as far as education goes. It is also fact that violent crime has dropped significantly where cannabis has been legalized. Additionally to this fact is that this reform is defunding cartels and gangs. New studies are now showing that in states that legalized, teen use is down. Yet an even bigger area to touch, is the medical benefits. Cannabis is proven to provide help with seizures, anxiety related disorders such as PTSD, and a safer, better treatment for cancer. Prohibition has failed us and has been an economical detriment. This attack on the free market as well as the free people needs to end now. As you see, we the people are ready to reembrace this incredible plant. The time is now to stand with us.

Patrick Conley  
Pittsburgh, PA 15227

Marijuana should be legalized due to the fact of it helping people calm down & relax. People who smoke marijuana for; Chronic Back Pains, Cancer, MS, and other health problems should be able to smoke, instead of basically eating a handful of pills everyday. It helps depression, insomnia, depression, anxiety & many more mental/psychal problems.

Marijuana can do so much good, and it's almost 2015! People get into drunk driving accidents all the time but guess what alcohol is still on the market. There are tons of things that are legal that are much more dangerous than marijuana

Diana  
Coraopolis, PA 15108

Dec 18, 2014

---

I have a cousin of whom has several medical illnesses that stem from his service in Iraq and Afghanistan, of whom has testified along with the millions of other veterans experiencing the same problems, that cannabis is the only cure. On another hand, I had an aunt who passed away from cancer who I believe could have benefitted from using cannabis, if not have been cured. Also, a younger cousin of mine, has epilepsy and has no cure: his parents are denied the Charlotte Web CBD Oil that could cure him. Beyond these familial reasons, or the health benefits in general, it is plainly been exemplified in other instances that cannabis can serve other purposes specially pertaining to hemp and oil. On another level, the monetary benefits, could boost the economy. Overall, even though I myself abstain from the use of cannabis, I believe the prohibition of cannabis should be repealed because the benefits far outweigh the detriments.

Nobody should go to jail over cannabis. Not for growing it, selling it, having it, or using it. Prohibition was never the right policy, and it's time Pennsylvania learned from its mistake. Remove criminal penalties, regulate commercial cultivation and sale, tax retail sales at regular sales tax rate, and you have the start of a solid policy.

This needs to happen. Alcohol has ruined many lives including some in my family. But Marijuana hasn't harmed nearly 1 percent of people compared to alcohol. This needs to happen. NOW.

steph baker  
gibsonia, PA 15044  
Dec 18, 2014

---

I think legalizing will help with taxes, better for the environment when we can use hemp make all sorts of things since it grows faster than wood and with that we won't have to cut down as much trees to build things with. Possibly stop all of the crime and shootings that has been going on since they might be drug related if its marijuana and not other drugs that can cause damage. And don't forget about how it could help in the medical field and all of the other studies in the medical field that has yet to use marijuana as a cure.

I'm in the process of moving out of state due to it's current state of legality. This is a chance to be a state that is a leader, and not a follower. I'm a medical patient and have to worry about being caged for treating my disease the best and safest way. It isn't fair, and everyone knows it at this point. Lets cut through the red tape and decriminalize ESPECIALLY allow home growing so I can save money instead of spending it on my medicine that keeps me healthy and productive.

The only people who do not want me to grow my own medication are the pharmaceutical companies and because of the accusation of a transaction of 1 gram of marijuana I am a Felon. Can you explain to me the Justice in this? No Victim No Crime. I need my medication to function. You can not and will not stop me and others from attaining it. Decriminalize and help with addiction properly, instead of jailing every pothead and giving them a 101 class in how to be a criminal.

Legalization of marijuana is something of great importance on not just a medical standing, but as a renewable resource as well. It's time the business/money side of politics steps back and hears this issue based on medical and scientific facts, not the misleading info that has been spread throughout our country for over 100 years.

The people of Pennsylvania need complete legalization of cannabis. I personally am in chronic pain due to medical issues. Suffer from anxiety and panic attacks. Also I am allergic to pain meds. Cannabis is my only relief. Please have compassion for those of us who suffer. Less dangerous that alcohol sand prescription medication. Look at prescribed medication over doses. Cannabis does not have any. Thats right ZERO DEATHS!!

Please legalize and tax the sale of cannabis in Pennsylvania. The amount of money saved on prosecuting and imprisoning people for such a silly thing as a naturally grown plant is a huge waste of money. Also the tax revenue from said sales could go to fix our highways and bridges in the state and especially around Pittsburgh. After that put all of the money into education so that we can become an example for other states to follow.

I feel just the same as those people who fought to have Alcohol Prohibition taken off the books, and now we have Legislation on the books pushing for the end of Marijuana Prohibition, We The People of Pennsylvania need this Now! Don't let the great people of Pennsylvania suffer like they did through the Prohibition of Alcohol.

legalize for medical purposes. there are tens of thousands of people in Pennsylvania living with chronic pain that would benefit from the medical use of marijuana and getting off pain pills, or for those that can't even afford pain pills they would be able I afford some relieve that won't damage their bodies and leave them addicted

1. The war on drugs doesn't nothing but keep rich people rich and poor people poor. It ruins communities and gets innocent people killed. 2. smoking marijuna is a victimless crime. It should be treated the same as smoking cigarettes and drinking alcohol. 3. why is cannabis still a schedule 1 drug? it has already been proven that it is less addictive than cigarettes and alcohol and it also has proven medical benefits.
