RE: Support of Continuance of the Act 13 Impact Fee Funding.

Dear Chairman Yaw:

The Board of Supervisors of West Finley Township are requesting your support in the continuation of the Act 13 Impact Fees currently being collected and distributed to local townships. Our main source of income for the township is tax collection.

So far, our township was able to upgrade machinery using the Act 13 Impact funding. Several new machines were purchased; including a tractor, wheel loader, skid loader, backhoe, and rotary mower. This would have taken several years to accomplish without the funding.

Our township plans to fund an upgrade of the machinery/office building in the future. This main building was built in 1978 and an addition was added to the rear of the building in 2012. Upgrades to the machinery/office building in the past few years were:

1. closing in one bay so it could be heated if equipment needed repaired, and
2. the floor of the office has been replaced.

Future plans for our building include replacing the large garage doors, replacing the rain gutters and painting the roof and sides of the building (36'x116')..

Our township strives to keep real estate taxes low and the Act 13 Impact Fee funds have allowed us to pass this savings along to our property owners. We are asking that you support the continuance of the Act 13 Impact Fees so that our property owners will continue to take advantage of the low real estate tax declared by our township.

Sincerely,

David D. Martin, Chairman
